Forecast for Wednesday 09 Jun 2021

Weather: It will be a clear start to the day but cloud cover will increase through the morning as low cloud moves in from the south-west with periods of drizzle by the evening. In the east of the region there is more of a chance of seeing slightly improved conditions with some breaks in the cloud possible in the afternoon.

Chance of cloud free mountain/hill tops above 600m: 50% becoming less than 10% by mid-afternoon.

Visibility: Good to start but becoming poor by mid-morning as widespread cloud with bases around 400m in the west and around 700m in the far east covers the hill, particularly poor in the west during any persistent periods of drizzle.

Meteorologist's View

Conditions will be much worse on western facing slopes with improved conditions in the east. High humidity means that it will feel very muggy on the hills as well.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 10 Jun 2021

Weather: Another warm but cloudy day with low cloud and some rain and drizzle in the western regions. Cloud will become more broken up in comparison to Wednesday with some sunshine with high UV levels possible in the east through the afternoon though it will remain muggy.

Maximum wind: South-westerly means 22mph with gusts of up to 35mph.

Chance of cloud free mountain/hill tops above 600m: Less than 10% to start becoming 40% in the west and 60% in the east in the afternoon.

Visibility: Very poor with widespread cloud with bases around 400m first thing, improving through the day to break up and lift to 800m in the east. Remaining around 400m in the west but becoming more broken to allow some hill tops to be visible from time to time.

Temperature: **Valleys:** Plus 12 Celsius becoming Plus 17 Celsius.
At 600m: Plus 10 Celsius.
Freezing level: Above the summits.
